PROFESSIONAL SUMMARY

Performance-driven Adtech Analyst and Program Manager with 5+ years of experience scaling advertising revenue across high-growth food-delivery platforms in the UAE and India. Proven expertise in P&L ownership of AED 400M+ ad budgets, AI-powered automation engineering, and cross-functional team leadership. Combines deep analytical fluency in SQL, Python, and Tableau with practical capabilities in automated ETL pipelines, targeted prompt-based data cleaning, and scheduled CLI-driven alerting systems to deliver measurable top-line revenue growth.

WORK EXPERIENCE

Performance Adtech Analyst

Talabat (UAE) · October 2024 – Present

- Owned end-to-end P&L responsibility for AED 400M+ in annual advertising revenue, as measured by consistent month-over-month target attainment across the full UAE market, by building centralized performance dashboards and conducting weekly variance reviews with senior leadership.
- Managed and aligned a cross-functional commercial organization of 80+ Account Managers, 30 Team Leads, and 5 City Heads, as measured by unified KPI adherence and zero misalignment escalations per quarter, by designing standardized reporting templates, hosting bi-weekly calibration sessions, and providing executive KPI dashboard tracking across all city teams.
- Launched Food Stories Video Ads as a new premium ad format across the Talabat platform, as measured by 100+ major brand adoptions within the first two quarters, by partnering with product and sales teams to define placement inventory, build pitch collateral, and execute phased brand onboarding campaigns.
- Designed and deployed a Product Pricing Optimization framework for ad packages, as measured by a 5% month-over-month incremental revenue uplift, by restructuring bidding models, introducing tiered pricing logic, and running controlled A/B tests across high-density restaurant clusters.
- Reduced vendor churn and recovered AED 800K in additional monthly revenue (AED 5M+ monthly GMV impact), as measured by improved vendor retention rates and reactivation of lapsed accounts, by re-engineering VAT calculations, restructuring pricing packages, and rolling out guaranteed-ROI proposals for underperforming vendors.
- Steered country-level enablement and training curricula for the UAE commercial team, as measured by a measurable improvement in AM onboarding speed and pitch conversion rates, by creating standardized playbooks, hosting live workshops on ad product features, and building self-serve training modules for new joiners across all UAE markets.
- Built Python-based ETL pipelines that automated daily revenue reporting, as measured by eliminating 3+ hours of manual data work per day, by writing practical Python loops to connect BigQuery data sources to scheduled scripts that calculated MTD vs LMTD vs L2MTD variance metrics and fed live dashboards in Tableau and Looker.
- Deployed automated email and Slack status notifications for critical revenue deviations, as measured by achieving fully autonomous monitoring with zero manual oversight, by configuring scheduled Python jobs with conditional triggers via command-line cron scheduling and integrating BigQuery and Google Sheets via data connectors for real-time field leadership access.

Program Manager – Adtech

Zomato (India) · July 2021 – October 2024

- Scaled Zomato-Bharat's ad revenue engine to a \$15M monthly portfolio, as measured by total monthly advertising GMV across all active formats, by monetizing video ads, visit packs, AI-generated video creatives, and brand tiles across the platform's restaurant and grocery verticals.
- Achieved the Mission 125 Ads milestone of a 125-crore monthly advertising portfolio by December 2023, as measured by cumulative quarterly ad revenue crossing the target threshold, by orchestrating a national sales push across 695 cities, optimizing ad-format mix, and implementing performance-based incentive structures for field teams.
- Grew Average Revenue Per Order to 9.1 and reduced client churn from 17% to 10%, as measured by recurring monthly ad revenue protection of \$1.4M, by redesigning retention workflows, deploying automated health-score dashboards, and introducing data-driven pricing strategies for at-risk accounts.
- Led the regional rollout of Zomato Gold across North India, as measured by accelerated subscription adoption rates and improved city-level profitability, by executing end-to-end go-to-market strategy, mentoring a team of junior business analysts on regional data analysis and reporting frameworks, and coordinating cross-functional launch logistics with marketing and operations.
- Drove a 2.46% commission uplift across the North region restaurant base, as measured by incremental commission revenue captured per transaction, by leading a full commission structure overhaul from market benchmarking and competitive analysis through stakeholder

alignment to phased regional rollout.

- Created national analytics dashboards for executive visibility into ad revenue performance, as measured by adoption across C-suite and VP-level stakeholders for monthly business reviews, by consolidating fragmented city-level data into unified Tableau views with drill-down capability by region, format, and account tier.

AWARDS & RECOGNITION

- **Ads Champion** — Zomato, 2023
- **Commission Ace Champion** — Zomato, 2023
- **Ace Super Star Award** — Zomato, 2022
- **Ace Super Star Award** — Zomato, 2021
- **100% Scholarship in 12th Grade** — DPS

EDUCATION

B. Tech in Electronics and Communication Engineering

Jaypee Institute of Information Technology (JIIT) | 7 GPA

SKILLS

Core Analytics & Systems

SQL, Python (Pandas, DataFrames), Tableau, Looker, Google Workspace, BigQuery, Data Analysis, Revenue Forecasting, Dashboard Development

AI Automation & Orchestration

Prompt Engineering for Data Cleaning, JSON Schema Validation, Automated ETL Pipelines, Command-Line Cron Scheduling, Cloud Data Connectors, Automated Status Notification Systems

Strategic Leadership

P&L Management (AED 400M+), Adtech Product Optimization, Revenue Forecasting, Change Management, Cross-Functional Team Leadership (80+ AMs, 30 TLs, 5 City Heads), Churn Reduction, Wallet Share Optimization, Stakeholder Management, Program Management Operations
