PROFESSIONAL SUMMARY

AI-first Performance AdTech Analyst and Program Manager with 5+ years scaling advertising revenue across high-growth food-delivery platforms in the UAE and India. Owns Talabat's AED 400M+ UAE ad P&L end-to-end — budget planning, target setting, discount operations, and revenue forecasting — while building AI-orchestrated automation (agentic workflows, LLM-assisted data pipelines, autonomous alerting) that has cut hours of manual work for the sales organization. Selected as 1 of 40 AI Champions across 7 countries for advanced AI training to drive automation and revenue growth.

WORK EXPERIENCE

Performance Adtech Analyst

Talabat (UAE) · October 2024 – Present

- Selected as an **AI Champion** — 1 of 40 people chosen across 7 countries for an advanced AI training program to drive automation and revenue growth for the business.
- Awarded **Star Performer** recognition for meeting 100% of annual budget targets while driving a 12% MoM reduction in manual discounts.
- Own the end-to-end commercial operating cycle for the AED 400M+ UAE ad P&L — annual and quarterly budget planning, target setting, best-estimate forecasting, and discount governance — aligning 80+ Account Managers, 30 Team Leads, and 5 City Heads, and partnering across Finance, Legal, Sales, Regional, and Product teams.
- Launched Food Stories Video Ads and a dynamic pricing framework that drove 100+ major brand adoptions and a 5% MoM incremental revenue uplift through optimized ad placements and restructured bidding models.
- Reduced vendor churn and recovered AED 800K in additional MoM revenue (AED 5M+ monthly GMV) by re-engineering VAT calculations, pricing structures, and guaranteed-ROI packages for underperforming vendors.
- Built AI-orchestrated automation pipelines that eliminated 3+ hours of manual reporting per day, connecting BigQuery to scheduled workflows that calculate MTD vs LMTD vs L2MTD variance and feed live Tableau and Looker dashboards.
- Integrated BigQuery and Google Sheets into operational workflows via AI data-connectors, converting unstructured text logs into clean analytical datasets for real-time field leadership access.
- Deployed automated email and Slack alerts for critical revenue deviations via scheduled, conditionally-triggered jobs, achieving fully autonomous monitoring with zero manual oversight.

Program Manager – Adtech

Zomato (India) · July 2021 – October 2024

- Scaled Zomato-Bharat's ad revenue engine to a \$15M monthly portfolio by monetizing video ads, visit packs, AI-generated video creatives, and brand tiles across the platform.
- Grew Average Revenue Per Order to 9.1 and cut client churn from 17% to 10%, protecting \$1.4M in recurring monthly ad revenue through redesigned retention workflows and data-driven pricing.
- Led growth operations across 695 cities and launched Zomato Gold in North India, accelerating subscription adoption and city-level profitability through end-to-end go-to-market execution.
- Drove a 2.46% commission uplift across the North region restaurant base by leading a full commission structure overhaul — from market analysis through stakeholder alignment to phased rollout.

SELECTED PROJECTS — AI-BUILT TOOLS

- **AE Retention Budget Dashboard** — live drill-down tool (City Head -> TL -> AM) that replaced manual spreadsheet gap-tracking for CPC & Keywords retention budgets, refreshed hourly.
- **Talabat Dashboard Hub** — self-serve internal platform letting any team publish and share a dashboard instantly, cutting turnaround on ad-hoc reporting requests from the sales org.
- **Personal Work Tracker** — automation that logs tasks, wins, and contributions year-round and auto-generates a ready-to-use EOY review summary.
